

Alberto Zaccagni

Software engineer, nearly 20 years. Lisp enthusiast: Scheme and "The Little Schemer" shaped how I write code; Clojure is where I get paid to do it. Looking for my next Clojure role. EU-based, open to remote or relocation.

Minerva Digital Intelligence Jul 2024 - present, fully remote

Software engineer - *Clojure, AWS (Step Functions, DynamoDB, S3 Tables, Batch, EMR), Spark, Iceberg, NixOS*

Building clinical data infrastructure from zero.

Parser combinators extracting structured data from free-text medical documents.

FHIR R4 / HL7 / DICOM ingestion pipeline: outbox pattern over DynamoDB Streams, CDC, idempotent resumable retries; consent-management workflow on DynamoDB conditional writes with idempotency guarantees. Clojure toolchain: Integrant, Malli, transducers, core.async, Polylith.

Digitazon / Boolean Feb 2022 - Jul 2026, part-time fully remote

Education coordination / teacher - *React, HTML5, CSS3, Java, Spring, JS, Node.js, REST API*

Taught programming from scratch to student cohorts; coordinated and onboarded teachers; helped founders design new courses.

Nozomi Networks Sep 2017 - Feb 2021, Mendrisio (CH) and then fully remote

Software developer - *Scheme (Owl Lisp), TypeScript, JS, C++, TDD, CI/CD*
Extended [Radamsa](#), an open source tool for fuzz testing written in a dialect of Scheme; introduced, presented the plan to the team, and drove the migration of all our frontend code to TypeScript.

McKinsey & Company Feb 2016 - Dec 2016, London (UK) and partially remote

Software developer - *Elixir, JS, TDD, REST*

Introduced Contract Integration Testing and test-generated documentation using two tools I built, one open-sourced as Swaggins.

Created a small iPad app for a partner event.

Worked on an Elixir based app for routing / authentication of micro services.

B2M Solutions Feb 2014 - Dec 2015, South Oxfordshire (UK)

Software developer - *JS, Angular, Node.js, AWS, CI / CD pipeline, REST*

Daily pairing on a TDD codebase kept at 100% coverage; nothing shipped without review.

Started the migration to microservices, introduced HAProxy, and wrote jedlik, a fluent query interface for DynamoDB. Introduced hallway testing during a site redesign.

Earlier 2006-2014: FACEIT (lead frontend, Node.js platform at scale), Sinapsi, Nextre, Visiant (mainly Java based)
