

Alberto Zaccagni

EXPERIENCE - 15+ years as software developer

Minerva Digital Intelligence Jul 2024 - present, fully remote

Software developer - Clojure, AWS Step Functions

Building a product from the ground up in the healthcare industry.

I am helping the team implement agile processes, build our infrastructure on AWS, write parser combinators to extract information from free text medical documents, write microservices, APIs, structure job pipelines, and craft a UX on the front-end that could deliver the value we're creating.

Boolean Sep 2024 - present, part-time fully remote

Teacher - React, HTML5, CSS3, Java, Spring, REST API

Teaching programming from scratch to groups of students.

Digitazon Feb 2022 - Jun 2024, fully remote

Education coordinator and teacher - React, HTML5, CSS3, Node.js, JS, Java, REST API

I've been teaching programming from scratch to groups of students, coordinating and onboarding teachers, and supporting founders in defining new courses.

Nozomi Networks Sep 2017 - Feb 2021, Mendrisio (CH) and then fully remote

Software developer - Lisp, Ruby on Rails, Angular, TypeScript, JS, C++, TDD, CI pipeline

Extended Radamsa, an open source tool for fuzzy testing written in a dialect of Scheme; introduced, presented the plan to the team, and migrated all our frontend code to TypeScript.

McKinsey & Company Feb 2016 - dec 2016, London (UK) and partially remote

Software developer - Elixir, JS, TDD, REST

Introduced Contract Integration Testing and test-generated documentation using a couple tools I developed, one of which is OSS.

Created a small iPad app for a partner event.

Worked on an Elixir based app for routing / authentication of micro services.

B2M Solutions Sept 2014 - dec 2015, South Oxfordshire (UK)

Software developer - JS, Angular, Node.js, AWS, CI / CD pipeline, REST

I worked most of the time in pairs, releasing features after a code review.

I got the chance to: start the migration to a micro services oriented architecture, introduce HAProxy, create a library that exposes a fluent interface for building queries on DynamoDB.

I also took the chance to introduce hallway testing when we redesigned our website.
